EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lisa Haile on June 9, 2004.

The application has been amended as follows:

Non-elected claims 33-37 were cancelled without prejudice towards further prosecution.

2. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to methods of detecting nucleic acids where one oligonucleotide is linked to a PEPTOID (not peptide) tag as defined in the specification and is ligated to an oligonucleotide linked to a selector tag where both oligonucleotides hybridize adjacently on a target. While ligation detection assays are well known, as evidenced by both of the cited references, Koster and Montforte, no prior art was found which taught or suggested the use of peptoid tags for use in ligation based analytical assays. In fact, no prior art was found teaching or motivating the use of peptoids as labels for any nucleic acid based assay. In the absence of such prior art, the claims are novel and unobvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
